About The Home

By Frances Dell

It is a good idea to keep a chart of stain removal next to your washing machine. This simple step may save you endless worry and expense.

Many of us have had a forgotten ballpoint pen, left in the pocket of a shirt during washing, and the stain the shirt and other pieces in the washing machine. The best way to remove this seemingly impossible stain is to sponge with carbon tetrachloride. Follow this with a complete washing with rich warm suds.

A cut finger can result in ugly stubborn stains. The method in this case is to soak the stained garment in cold water until the stain is light brown. Then wash in warm suds and rinse. Never use hot water as heat sets the color.

Candle wax is a common problem. First, scrape off all the excess wax possible. Then place the stained spot between white blotters and press with a hot iron. Lastly, rub the spot with cold iard or turpentine and wash in warm suds.

Has there ever been a child who has not stained his clothes with chocolate or cocoa? The best remedy for this stain is to wash it at once in hot suds. The remaining stains can be treated with a weak solution of household bleach or hydrogen peroxide. Re-launder in hot suds.

Egg-stain can be removed by first scraping off excess egg then a couple of hours of soaking in cool water. Change this water several times if the stain is large. Wash in warm suds to finish the job.

Health and Beauty

With summer on us, you will hear a lot about cutting liquids and salt in your diet if you want to lose weight.

The reduction of salt in your diet, except under a doctor's care, is foolish and dangerous — very much so during the summer. Restriction of liquids is of no use whatever. If you cut on liquids in a few days you will lose pounds rapidly. However, your weight will go right back up as soon as your thirst causes you to return to your normal intake of water.

Water is essential to life. You can go without food for weeks, but you die of thirst within a few days. Our bodies are seventy per cent water.

If you do not drink enough liquid, your body will extract and retain the water you must have from the "solid" foods you eat. This will interfere with elimination and other important body processes.

Remember cutting down on liquids causes a certain loss of water—not fat. In fact many doctors advise an increased amount of liquids during a reducing diet.

Appomattox is a growing town.

GREAT NAVAL REVIEW AT HAMPTON ROADS

Richmond, June 5.- Hampton Roads will be the site of the largest peacetime gathering of warships during an International Naval Review, scheduled for June 8-17.

More than 20,000 foreign sailors and marines are expected to visit Virginia for its 350th anniversary celebration of the founding of the first permanent English settlement at Jamestown.

The review itself will be held in the world's largest harbor, Hampton Roads, on Wednesday, June 12, or on the next succesive day of fair weather. But the ten days set aside for the naval spectacle will be jam packed with activity.

Entertainment features during the review period range from country music and jazz to the Norfolk Symphony. There'll also be a circus, an ice show, folk dancing, and the classic Spanish dancing of Jose Greco.

Other — more military — features during the review will include a variety of activities at naval installations in the Hampton Roads area, such as demonstrations of amphibious assaults and the precision flying of the Navy's famed "Blue Angels."

Twenty-seven nations have been invited to participate in the review and as many as 80 ships, ranging in size from minesweepers to carriers may be there.In addition some 50 ships from the U. S. Atlantic Fleet may be assigned to the show.

The ships will be berthed at the Norfolk Naval Base piers, so the public can inspect them. For the review, the ships will move to anchorage positions along two columns from the naval base to Fort Story, a distance of about 14 miles. The reviewing ship or ships will leave Fort Story and return, passing between the columns twice.

Secretary of Defence Charles Wilson is scheduled to review the ships.

The last international naval review in the United States was held in 1907 at Hampton Roads to help celebrate the 300th anniversary of Jamestown's settlement.

Appomattox High School finals being held this week.

In FASHION Now

Swim suits echo the more feminine trend apparent everywhere in fashion. The extreme bikini — which was never a favorite of American women, has been replaced (even by women with perfect figures) with a more modest and flattering line.

Boy pants are much in demand. The halter top and the strongly-molded shoulder strap tend to outshine the strapless models.

Many of this summer's suits of fer swimwear with foam rubber interlining in the bra. This assures even the very slender of a superb silhuette at the beach.

This interest in form, fit, size, etc. of the American woman's chest area is hard to understand. Doctors tell us it is unhealthy because it causes many young women not blessed with full curves to be very self-conscious. Bathing suit designers and bra designers are doing all that can be done to make the flat-chested girls happy. Who is to say this is a bad thing since the trend is already established? Let's just hope this latest American fad passes.

Hawaiian inspirations are handsome when adapted by our swimsuit industry. These designs, always soft and becoming, are much in demand.

County Farmers To Vote Thursday

Appomattox County farmers are set to vote on Thursday, June 20 on the question of continuing wheat marketing quotas for a fifth successive year. Quotas were proclaimed by the Secretary of Agriculture for the 1954-55-56 and 1957 wheat crops and each time approved by growers by a vote far greater than the required two-third majority. This time they vote on 1958 wheat quotas.

As a reminder of the issues involved, ASC chairman reviewed the main facts farmers should know before voting:

(1) Voters will be handed a printed ballot on which the farmer is asked "Are you in favor of marketing quotas for wheat for the 1958 crop " Voters will mark the ballot "For" or "Against."

(2) If quotas are approved by a two-thirds majority on a national basis, penalties will be assessed on excess wheat production and price supports at not less than 75 per cent of parity will be available to farmers who comply with their allotments. Excess wheat production is production on acreage in excess of the allotment where the acreage grown is over 15 acres.

(3) If quotas are not approved, allotments nevertheless will be in effect for price support purposes, and price support at 50 per cent of parity will be available to complying growers.

(4) Eligible voters in the referendum are persons who will share in a 1958 wheat crop from a farm on which the wheat acreage to be harvested, plus any acreage placed in the Soil Bank Wheat Acreage Reserve, will be more than 15 acres.

The voting place in Appomattox County is the ASC office. The polls will be open from 8:00 A. M. until 7:00 P. M.
